

VALUE ADDING PLANTATIONS

The Greens have a vision for a local timber manufacturing industry to create real jobs and real profits from Tasmania's plantations.

Rather than a toxic and divisive pulp mill that would rely on public subsidies, the Greens want to see fine furniture, architectural timbers and modern building materials.

SCIENCE AND RESEARCH

Tasmania already has the highest per capita number of scientists of any Australian state.

The Greens will maintain Tasmania's status as the world's Antarctic research hub, and fight against planned cuts to the University and CSIRO.

This election, we have a choice.

We can keep doing things the way we've done them in the past, or we can embrace new thinking.

We can try to be the same as everywhere else, or we can celebrate what sets Tasmania apart from the rest of the world.

The key to creating jobs in our island economy lies in emerging opportunities in renewable energy, agriculture, science, education, digital innovation, environmental protection and remediation, communications, creative businesses, tourism, fine foods, wines and beverages.

It's the Tasmanian people who will write the next chapter in Tasmania's story.

If you want change in Tasmania, vote for a party that believes in change. Vote for the Greens.

GREENS CANDIDATES FOR DENISON

VOTE **1** CASSY O'CONNOR

VOTE **2** BILL HARVEY

VOTE **3** PHILIP COCKER

VOTE **4** PENELOPE ANN

VOTE **5** ALAN WHYKES

VOTE **1** CASSY O'CONNOR FOR DENISON

Cassy O'Connor is the Tasmanian Greens MP for Denison. She supports creating a prosperous, low-carbon economy powered by renewable energy, and is a passionate voice for people with disabilities, multiculturalism and Tasmanians who are doing it tough.

“ I want Tasmania to create its own future, and the best way to do that is by working together.

We're a clever and creative island – let's do it!”

TASMANIA.
CREATE
OUR OWN
FUTURE.

▲ EDUCATION

Education is the key to Tasmania's future prosperity.

The Greens will invest strongly in our teachers and in early childhood education, where the greatest gains can be made.

The Greens will increase funding for year 11 and 12 programs in regional areas, and continue to fight for the full six years of Gonski funding promised by the Federal Government.

▲ RENEWABLE ENERGY

Tasmania's renewable energy is a key competitive advantage for our state.

The Greens will work to grow clean energy skills and jobs in Tasmania by supporting investment in renewable technologies like wind, wave, geothermal and solar.

The Greens will continue to invest in energy efficiency upgrades for thousands of low income households and small businesses.

▲ POKIES

Poker machines suck money out of local small businesses and communities. The Greens will remove pokies from your local community.

▲ INFORMATION TECHNOLOGY

Tasmania already has award winning IT companies creating apps and programs for users around the world.

The Greens will invest in attracting data centres to Tasmania, taking advantage of our renewable energy and cool climate.

The Greens will give local manufacturers and retailers the help they need to compete for new customers online.

▲ HEALTH AND AGED CARE

A healthy economy and the health of our people go hand in hand.

The Greens have a plan to create jobs for new health professionals in rural and regional areas.

The Greens will invest in preventative health and better support for older Tasmanians in aged care.

▲ CREATIVE INDUSTRIES

The creative industries are expanding faster than mining and manufacturing in Tasmania, and their contribution to the state's economy already exceeds forestry.

The Greens will support highly skilled jobs in architecture, digital design, film and television production, marketing, publishing and software design.

▲ AGRICULTURE AND FISHERIES

The world wants a taste of Tasmania thanks to our clean and green brand, our GE-free status and new investments in irrigation.

The Greens will make Tasmania's GE-free status permanent, and invest in marketing Tasmanian products to overseas customers.

The Greens will fight to defend our productive farmland from the damaging effects of mining exploration and fracking.

The Greens will stand up for our sustainable local fisheries, against the destructive super-trawler.

▲ ENVIRONMENTAL PROTECTION

Environmental protection and remediation is an important growth industry.

The Greens will invest in looking after our National Parks, remediating mine sites and adapting to impacts of climate change on our environment.

▲ SMALL BUSINESS

Small business is the engine room of Tasmania's economy.

The Greens will reduce costs for small business by investing in energy efficiency to bring down power bills.

The Greens will help small businesses to implement creative online sales strategies.
